

## Ex\Immersio VI - Soundscapes in Change. On Listening and Sustainability Klanglandschaften im Wandel. Über Zuhören und Nachhaltigkeit

Ex\Immersio is a series of international symposia that was launched in 2019 under the scientific and artistic direction of Prof. Sabine Breitsameter. Its aim is to establish a critical intellectual and artistic discourse on the term "immersion". This year's focus is on the emergence of a new listening culture in the changing soundscape of the present, related to the question of how listening can productively contribute to solve the ecological dilemma.
